SWISSINNO

“we protect what you love”

SWISSINNO – the name stands for functional Swiss design, high quality and top European products. At the heart of our work is the protection of people and their private spheres against pests and parasites. At the same time, we are carefully concerned to carefully ensure ecological sustainability, environmental protection and the species-appropriate treatment of animals. Out of respect for nature.

Visionary thinking and innovative work processes are essential for the development of our products; this motivates us to continually reach new milestones. We set standards in pest control and play a leading role throughout Europe. This success is based on a corporate culture characterised by mutual appreciation, respect and fairness, both among our employees, with our suppliers, customers and end consumers.

We are actively shaping the future of responsible pest control.

Responsibility & Sustainability

- FSC certified and environmentally friendly raw materials
- Recycled Plastics (PS)
- Environmentally friendly packaging (PET, cardboard, etc.)
- Over 60% EU production
- Blue Angel eco-label
- UBA certification according to §18 of the German Infection Protection Act IfSG / EU NoCheRo guidelines for evaluating rodent traps

Automatic digital notification of mouse and rat trap activation via app

- Receive push notifications about the triggering of a trap directly on your mobile devices, such as a smartphone or tablet.
- Check the status from the comfort of your sofa and save the hassle of having to check the traps.
- Connect SuperCat is compatible with all SWISSINNO mouse and rat traps and is so simple to attach.
- Ready for immediate use and intuitive to operate.
- The app is available for *Apple IOS* and *Google* devices.
- Multiple devices can be connected to the Connect SuperCat app, instantly check the status of all your traps in one go.
- Utilises the latest Bluetooth 2.0 technology to deliver cutting-edge information transmission.
- Only requires two AAA batteries for instant start-up (not included with the product).
- **Use biocidal products with caution.**
Always read the label and product information before use.

Super-efficient PRO SuperCat Mousetrap without fail catches

- Super-efficient trap eradicates mice through its *easy catch mechanism*.
- Our latest addition to the SuperCat range is this amazing mousetrap with its ingenious trigger mechanism and its powerful hammer-blow strike-bar. This new design kills mice instantly and humanely without inflicting unnecessary pain or suffering.
- The new trigger mechanism with its inbuilt stability prevents the mouse from setting the trap off accidentally. Only when the mouse starts to eat and enters deeper into the trap is the mechanism triggered.
- The process is augmented by the powerful strike of a very high-tension sprung strike-bar and the trap's clamping device, which is easy to use and locks automatically when the bait-holder is removed.
- The dead mouse can be discharged from the trap without its being touched: just hold the trap up and press the flap on the back the carcass will fall out leaving the trap empty and ready to use again.
- The PRO SuperCat mousetrap is certified in accordance with §18 of the German IfSG infection protection law as the sole measure for controlling house mice.
- **Use biocidal products with caution. Always read the label and product information before use.** PT19.

MOUSE TRAP

NO SEE NO TOUCH

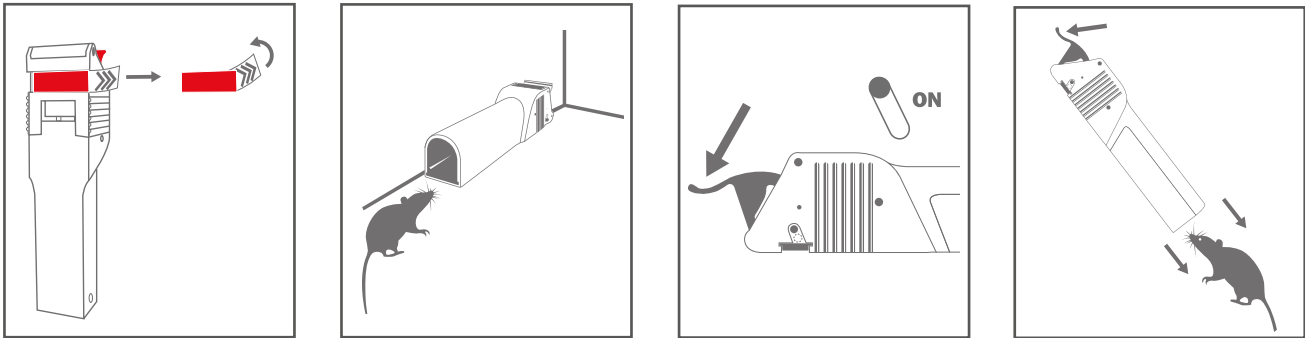

The hidden solution!

- The SWISSINNO mousetrap "No See No Touch" captures mice safely and hygienically.
- The patented catching system avoids eye and skin contact with the «animal», so that the actual killing process is performed out of sight.
- The killing process is performed discretely within the trap.
- After the mouse has been captured and killed, it can be discarded without being touched.
- The mousetrap "No See No Touch" is certified in accordance with §18 of the German IfSG infection protection law as measure for controlling house mice.
- **Use biocidal products with caution.**
Always read the label and product information before use.

COMPACT FOLDING LIVE CATCH TRAP

Catch multiple mice safely for release unharmed

- **Folds flat, deploys in seconds** - All-in-one collapsible design - no separate parts. Unfolds instantly and fits tight runs along walls and edges.
- **Built-in bait holder** - Dedicated compartment above the trapdoor for SuperCat Rodent Bait, placing mice at the ideal trigger point.
- **Smartdrop trigger mechanism**, no missed catches - Optimized mechanism prevents premature door activation.
- **Self-resetting, multi-catch** - Perfectly balanced trapdoor resets automatically after each catch - captures multiple mice overnight with zero intervention. Ideal for heavy infestations.
- **Animal welfare** – Spacious bucket holds several mice comfortably. Add food and paper bedding when setting - no sharp edges.
- **Semi-transparent bucket** - easy check, the lightly opaque walls let you detect the silhouette of captured mice at a glance, so you know when it's time to empty and release without opening the trap or unnecessary handling.
- **No-touch release** - Mice released without direct contact — clean, safe, and stress-free for both user and animal.
- **SuperCat Connect ready** - Integrated mount for the Connect Catch Alert module — instant smartphone notification the moment a mouse is caught.

Drive rodents out of the home

- SWISSINNO ultrasonic rodent repellers send out sustained high-frequency sound waves that frighten mice and rats away.
- They are totally inaudible and harmless to humans.
- They are specially designed to drive away rats, mice and other rodents without having a negative effect on pets.
- They use no toxic chemicals, thus ensuring complete protection for animals and the environment.
- Easy to plug in to any household socket.
- Designed for indoor use.

STOP & PROTECT REPELLERS

- MOLE
- CAT

STOP & PROTECT REPELLENT POUCHES

Natural scent-based protection against mice, martens, moles and cats - poison-free

- **100% natural** - Blend of dog hair from various breeds (heat-treated) with fragrance and plant wax.
- **No toxins, no killing** - Acts purely through scent, naturally deterring animals.
- **Triple action** - Preventive, repellent and blocking - protects before animals enter, actively drives them away and creates an invisible scent barrier that stops animals from approaching.
- **No habituation effect** - Each pouch contains hair from different dog breeds. To the animal, every pouch smells like a new, unknown dog - keeping the protective effect permanently active.
- **Easy to use** - Simply place or hang the pouch - no tools, no effort.
- **Long-term protection** - The effect is strongest at the start. To maintain full protection, we recommend adding a new pouch after 3 months.
- **Pleasant indoors** - Added fragrance makes the pouches pleasant-smelling for humans.

RODENT STOP PREVENTION STEEL WOOL

The fast and easy solution!

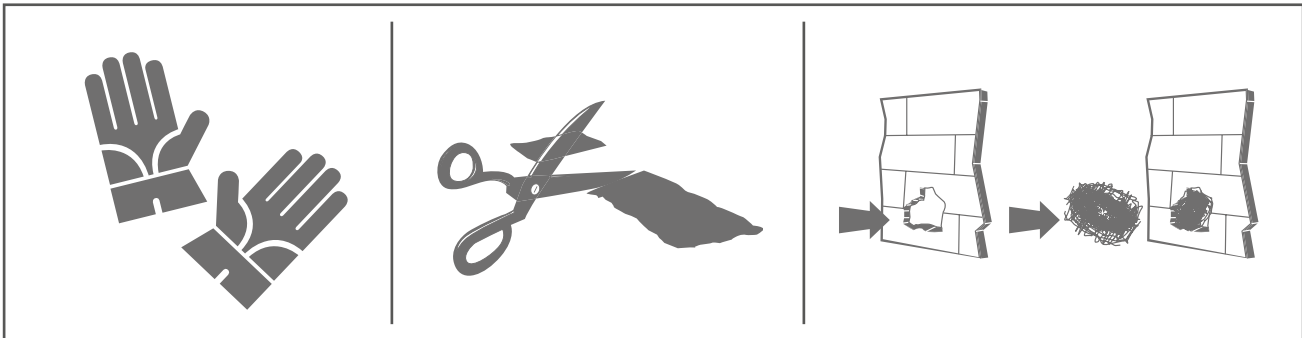

- **Effective barrier:** Keeps rodents, wasps, and insects away by sealing gaps and cracks.
- **Durable:** Highly resistant to weathering.
- **Easy to apply:** Simple to install in hard-to-reach areas.
- **Chemical-free:** No toxic substances, making it environmentally friendly.

Steel wool effectively protects against rodents, wasps, and insects by sealing gaps and cracks.

It is durable, weather-resistant, and easy to install, even in tight spaces. Additionally, it is chemical-free and environmentally friendly.

The wool is a blend of stainless steel wool and synthetic fibers. Nagerstop is effective against rodents, birds, bats, and insects.

COMPACT FOLDING MOUSE AND RAT CAGES
Catch rodents safely and release them unharmed

- **Folding design** - «single action» folds flat for storage, transport and sale; unfolds instantly, fits where rodents travel.
- **High quality** - sturdy, long-life galvanized steel; 100% rodent proof and sustainable.
- **Extended sizes** - captures all rodent sizes, including House, Norwegian and Rice rats.
- **Dedicated bait holder** - removable, recessed at the optimal trigger point for maximum efficiency.
- **Precision activation** - synchronised trigger and door for instant, clean closure; no tail or leg pinching, no outside activation possible.
- **Catches both mice and rats** - the rat cage catches mice and rats.
- **Animal welfare** - rounded edges at all critical contact points.
- **Drainage & ventilation** - moisture drainage, airflow slots and easy visual check through aeration holes.
- **Stress-free release** - rear door opens via external side bar; no contact with the captured rodent.
- **SuperCat Connect ready** - instant smartphone notification the moment a rodent is captured.

VOLE TRAP **PRO** SUPERCAT

Safe, Effective & Easy to use

- Easily set in seconds with a handle - pull the handle up to the stop and the trap is ready for use.
- Requires little force - easy tightening of the tensioning device.
- No cumbersome digging necessary - fits exactly into a hole with 6 cm diameter.
- Triggered trap recognisable from afar. The handle returns to the trap when it is caught.
- Catches field mice and voles in either direction.
- Safe for users and pets.
- The new vole trap PRO includes a new trident trigger to also catch field mice, a reduced trigger force of 30 – 50% for a more sensitive catching trigger and an increase in the clamping spring force by 80% for a stronger impact.

MOLE TRAP SUPERCAT

Combats moles effectively

- Simple assembly: the trap can be opened quickly and easily without using force.
- Successful trapping of moles is possible in either direction.
- Gives a clear above-ground visual signal when the trap has been activated: the 'wings' drop down to the sides of the trap.
- Harmless to both user and pets.
- The SWISSINNO mole trap is perfect for professional use.
- It is very popular with gardeners, hunters and qualified pest control experts.
- The trap works entirely without the use of bait.

SOLAR MOLE REPELLER	1 704 001	 7 640104 977049	6	 (01)07640133577166

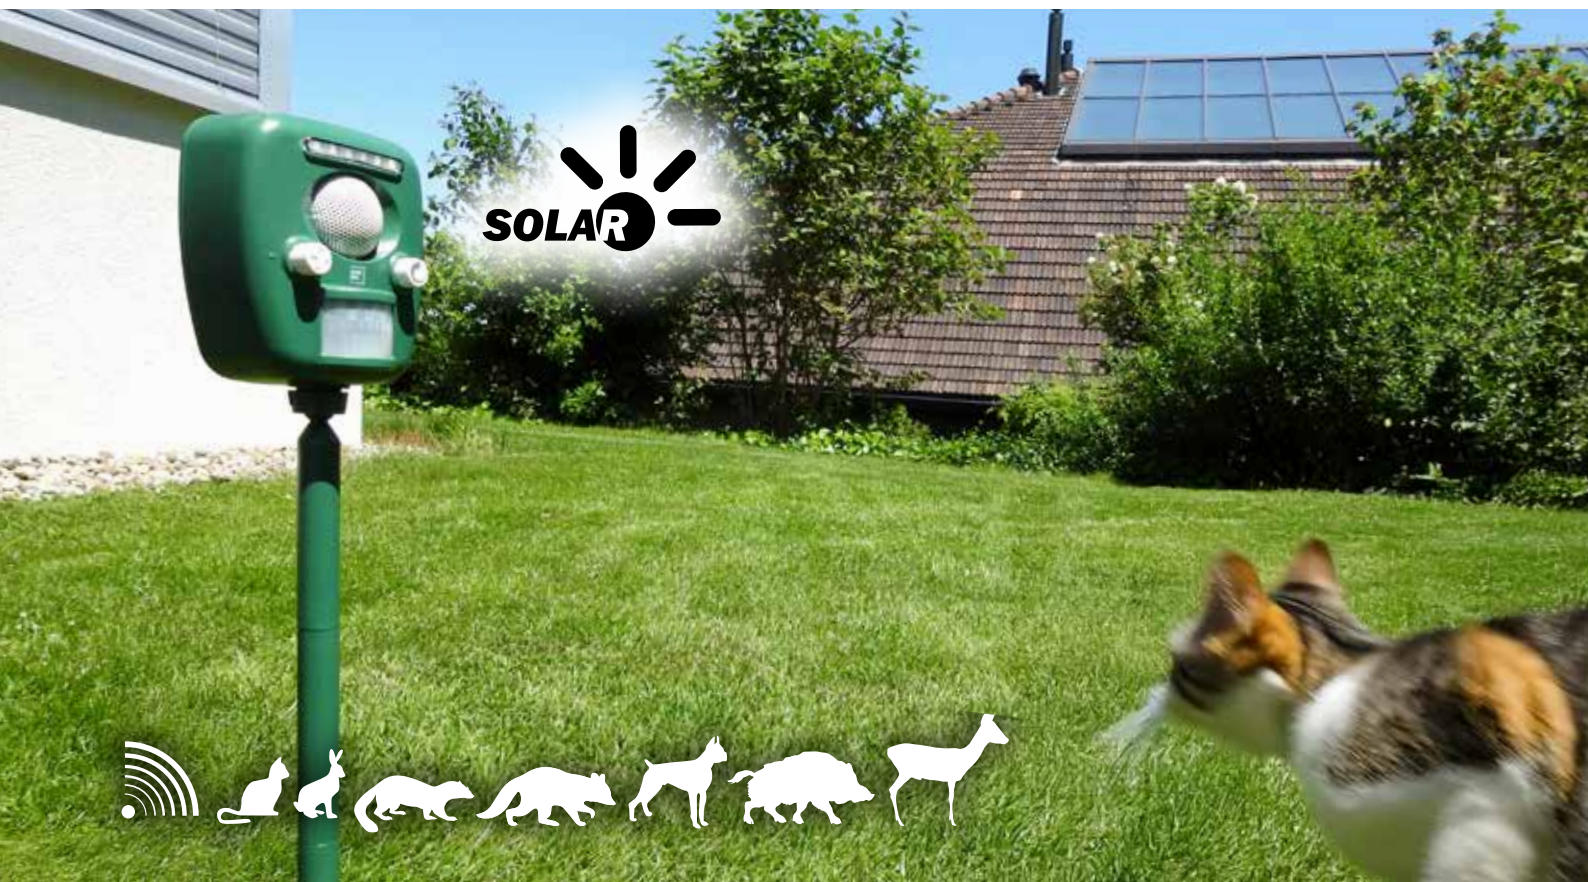

The preventive solution!

- Emits sounds and vibrations that are danger signals to moles, driving them away out of the range of the repeller.
- Easy to set up in gardens, parks, golf courses and sports centres.
- The solar panel is tilted at 45 degrees to maximise sunlight absorption for faster battery- charging.
- Safe for humans and causes no harm to domestic pets.
- Waterproof so can be left out in rain and snow.
- Battery included.

ULTRASONIC ANIMAL REPELLER **PRO**

Ultrasonic Animal Repeller PRO - Safe and humane animal defense

- **Extra-strong ultrasound up to 100 dB** - Repels cats, dogs, martens, wild boar, rabbits and more – effective and harmless, within the legally permitted dB limit.
- **Switchable LED light beam** - Serves as additional deterrence, can be activated separately from the ultrasound.
- **Dual audio-visual stimulus** - The combination of ultrasound and LED startles the animal and triggers an immediate flight instinct – without harming it.
- **Weatherproof** - Robust housing for permanent outdoor use.
- **Solar-powered** - Large solar panel charges the battery (4x AA, not included) for mains-independent continuous operation.
- **Flexible mounting** - Easily on a wall or via height-adjustable ground stake in the garden. Intuitive setup with no effort.

Efficient marten deterrent for cars through ultrasound & shock

- Strong ultrasonic vibrations and charged high-voltage platelets banish martens reliably and safely from the engine compartment.
- Preventative application against marten damage to the car.
- Tried and tested method of marten deterrence, without the use of poison or lures.
- Can be connected directly to the 12V car battery and switches off automatically when the battery charge is less than 11.8 V.
- Simple assembly and immediate availability.
- Sturdy, splash-proof, Swiss-quality design.
- Pet friendly! An effective marten deterrent that does not hurt them.
- Optional accessories for electric cars and plastic engine compartment.

INSECT FREEZE SPRAY

INSECT FREEZE

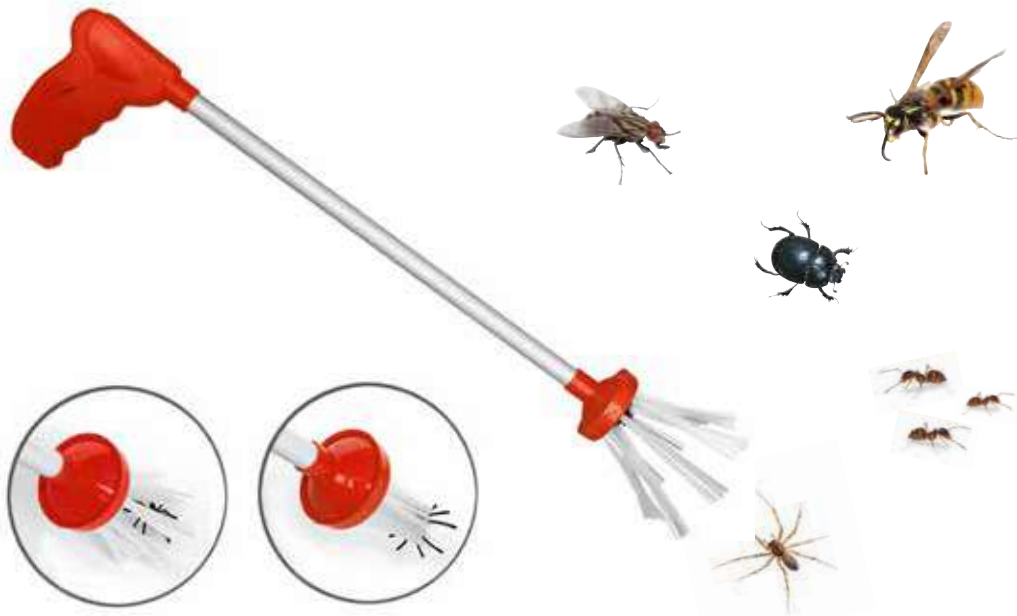

Insect freeze spray - no poison

- A poison-free alternative to conventional insect sprays with which pests are immediately put into shock paralysis. Simply spray unwanted insects with the freeze spray from a short distance and then remove them.
- Immediate effect: Rapid onset of shock rigidity through thermal combat at -45° .
- Perfect for use against wasps, spiders, ants, beetles, silverfish, woodlice, cockroaches, and other crawling or flying insects.
- Easy to use: Spray directly on the insect from a distance of 10 to 20 cm until it is covered in white frost.
- Odourless and leaves no residue.
- Allows frozen insects to be easily removed without killing them too.

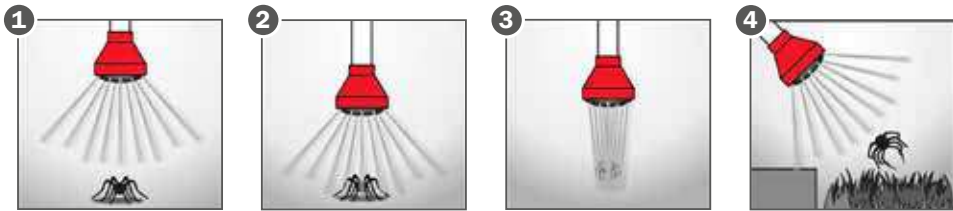

DESCRIPTION	ITEM NO.	BARCODE	PCS. / CRT.	TRADING UNIT
INSECT FREEZE SPRAY	1 290 001		6	

SPIDER CATCHER

- The most animal-friendly and innovative way to catch spiders & Co. - without killing them.
- Easily eject spiders, ants, beetles, butterflies, moths, wasps, bees and flies back to the wild without harm to them or you.
- Thanks to the 65cm long gripper arm, it is possible to catch the offending creatures from a comfortable distance and even easily reach into corners, up to ceilings and behind furniture.
- The spider and insect catcher is suitable for all crawling creatures, which are between 2mm and 25mm in size.

Keeping plagues of insects out of treetops

- The SWISSINNO Greaseband Trap catches wingless pests on its powerful adhesive coating and so prevents them from climbing up trees and causing damage.
- It protects the foliage, buds and blossom of fruit and ornamental trees and shrubs from winter moth caterpillars, ants and earwigs.
- The adhesive is odourless and contains natural resins and waxes so it will not dry out or wash off.
- It is poison-free and ideal for organic gardening.

BOX TREE MOTH TRAP

DESCRIPTION	ITEM NO.	BARCODE	PCS. / CRT.	TRADING UNIT
BOX TREE MOTH TRAP	1 440 001K		6	
PHEROMONES FOR BOX TREE MOTH TRAP 2x	1 445 001KS		6	

- Efficient infestation control (monitoring) for the protection of box trees. Via pheromones, the Box Tree Moth Trap draws the box tree moth into the trap. Afterwards, the box tree moth is dropped into a container and can no longer escape from it.
- No poison – a sex pheromone only attracts male box tree moths. Thus, the trap is absolutely harmless for bees and other beneficial insects. The level of infestation can be determined easily and biologically.
- Easy assembly and practical emptying. The trap is simply attached to the box tree using a hanging wire in a shady place. Due to the green colour, the trap is hardly noticeable in the box tree garden; it is therefore not visually disruptive.
- In case of infestation: Spray out with a pressure washer or a garden hose and collect the remaining caterpillars by hand. In case of intensive infestation, the moths/caterpillars can be sprayed with insecticides and removed.
- The Box Tree Moth Trap already contains a pheromone pack. Further refills are available as a practical set of 2 pieces.

- Traps flies on its adhesive inner surfaces - attracted to the light, flies settle on window panes where they gravitate towards the corners, enter the trap and are caught by the glue, and die.
- Tests show that within 48 hours of placing these window traps, virtually all the flies in a room will enter the traps and be caught.
- Trapped flies are hidden out of sight.
- With self-adhesive fixing pads.

MINI INSECT GLUE CATCHER

4 WATT

STICKY PAPER 10 pcs.

Economical and effective

- Effective and durable LED UV light. Lasts 10 times longer than conventional light tubes and saves energy.
- Innovative lock system with LED UV light and glue paper – no need for poison, chemicals or any electric shocks. Hygienic and safe for children and pets.
- The emitted UV light produces a strong attraction for the insects. The insects follow the light and land directly on the glue paper, to which they remain stuck and die.
- Flexible and individual use for the protection of numerous living spaces in your home! Thanks to the compact and ergonomic design, the catcher can be used in many indoor areas such as the kitchen, living room, bedroom, etc.
- Easy and fast cleaning. The glue paper is easy to change as needed. At the latest, this should be done every 2 months.
- Ensure continuous operation with a set of 10 replacement sheets of glue paper, sold separately.

INSECT DESTROYER

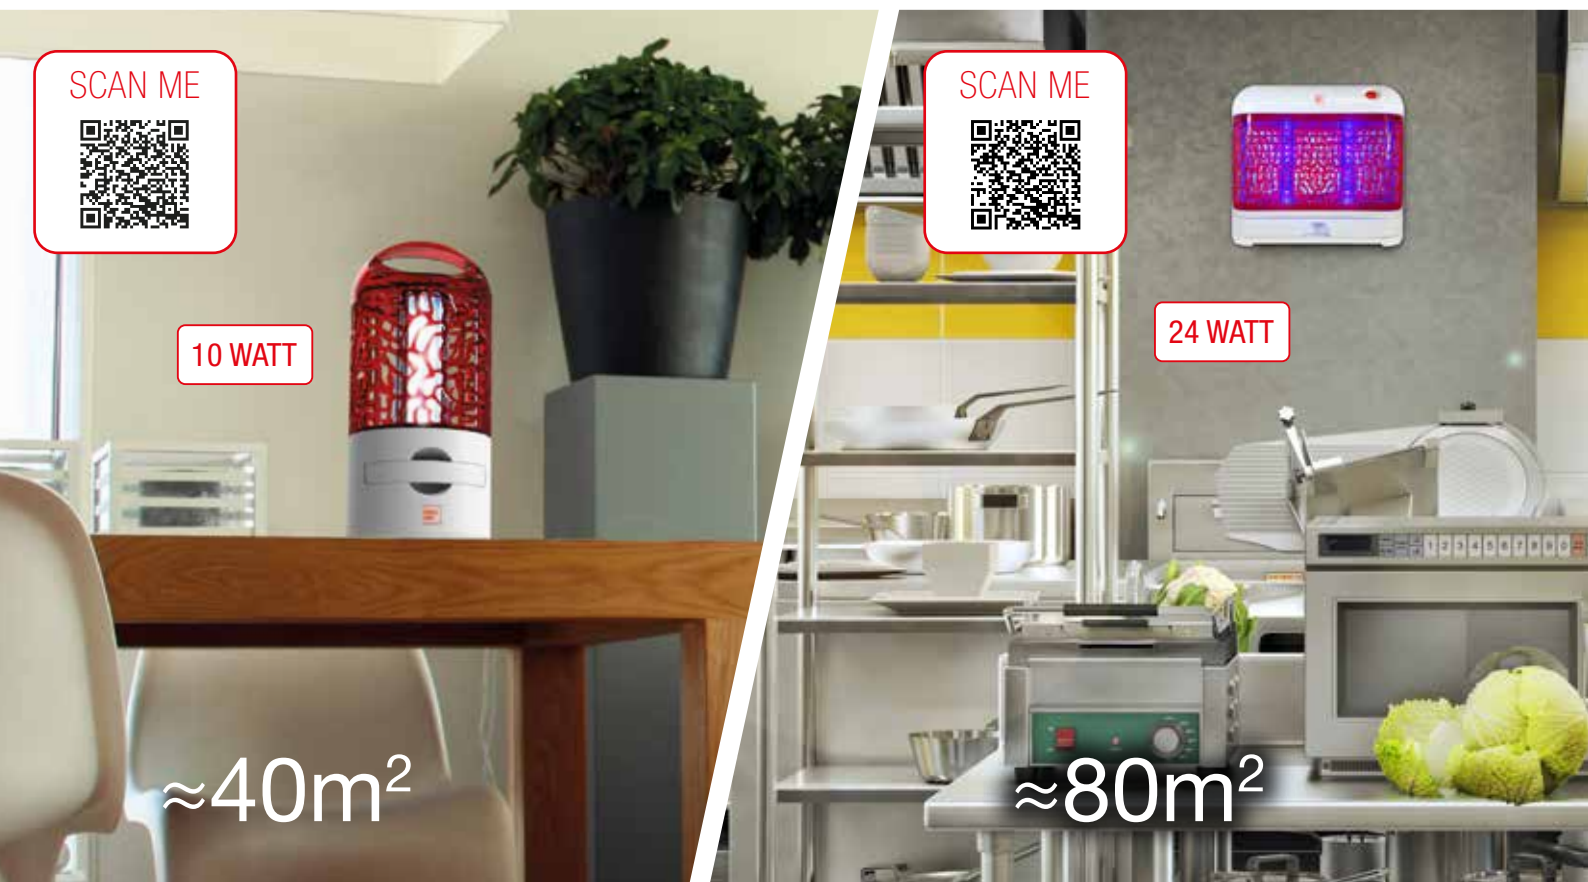

Economical and effective

- Destroys insects such as flies and mosquitoes that are attracted by an ultraviolet LED light and lured onto a high-voltage grid.
- Ideal for small and medium-sized rooms of 15m² to 20m².
- Hygienic due to simple cleaning - the container in which the dead insects are collected can simply be removed and emptied.
- No danger to humans or pets. Both the ultraviolet light and the high voltage grid are harmless.
- Low energy consumption and long product life thanks to modern LED technology.
- Much more efficient than fluorescent lamps.
- Thanks to ongoing research and improvement, the safety of the optimised high-voltage grid has been significantly increased. Our insect traps comply with the technical safety standard CE EN 60335-2-59 chapter 22.104, which stipulates that the short-circuit current must not exceed 10 mA for the product to be classified as safe.

INSECT DESTROYER

Effective over a large area

- The insect destroyer is ready for immediate use and, using an ultraviolet LED light, is an effective way of attracting insects such as flies and mosquitoes onto a high-voltage grid.
- Protects large areas of between 40m² and 80m².
- The device can be cleaned easily by emptying the detachable container that collects the dead insects.
- Ultraviolet light does not pose a threat to humans or pets. The high voltage grid has been designed in such a way that this too is completely safe.
- Modern LED technology ensures the lowest possible energy consumption and a long product life.
- Conventional fluorescent lamps often take twice as much power and last for a shorter period of time.
- Thanks to ongoing research and improvement, the safety of the optimised high-voltage grid has been significantly increased. Our insect traps comply with the technical safety standard CE EN 60335-2-59 chapter 22.104, which stipulates that the short-circuit current must not exceed 10 mA for the product to be classified as safe.

4 WATT

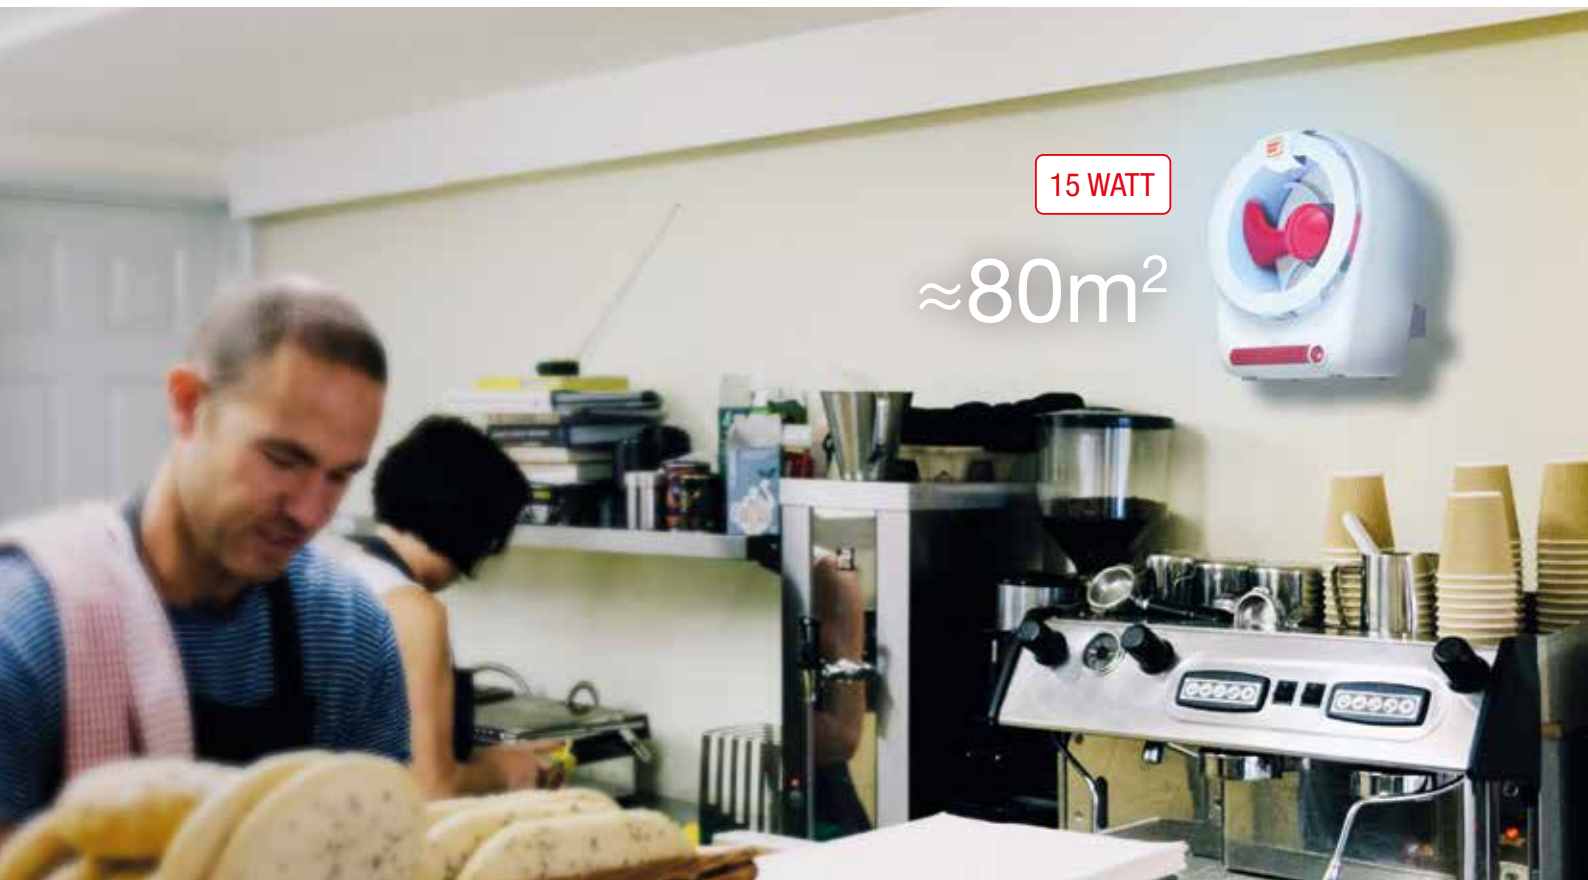

Mobile use

- A high-quality lithium-ion battery allows mobile use and can be charged easily.
- Insects (flies, mosquitoes, etc.) are lured onto the high-voltage grid by the ultraviolet light of an LED lamp, and killed.
- Optimal use in rooms of up to 20m².
- The dead insects are collected in a container that is removable and can be cleaned easily and hygienically.
- Neither the high voltage grid nor the ultraviolet light poses a threat to humans or pets.
- The LED lamp that emits the ultraviolet light is much more economical than a fluorescent lamp (less power required) and also longer-lasting.
- Thanks to ongoing research and improvement, the safety of the optimised high-voltage grid has been significantly increased. Our insect traps comply with the technical safety standard CE EN 60335-2-59 chapter 22.104, which states that the short-circuit current must not exceed 10 mA for the product to be considered safe.
- Perfect for camping, caravanning, 'al fresco' dining, holiday hotel rooms.

INSECT CATCHER

The professional solution!

- Attracts and exterminates flying insect pests with extraordinary efficiency.
- Uses no chemicals, or poisons; generates no fumes, or odours; causes no pollution.
- The catcher emits ultraviolet light, which attracts flies, moths, mosquitoes, midges and other flying insects. They are sucked into a container by a strong fan and they die by dehydration.
- It has a slim, compact and modern appearance and is ideal for use in any room in the home. It is also perfect for industrial and commercial premises like factories, offices, grocery, meat and fish shops and hospitals.
- Safe for people and pets.
- Covers an area of 80m².

Copper as a natural defence

- Snails do not like copper!
- If a snail or slug tries to crawl over copper, a chemical reaction occurs with its underside and forces it, in most cases, to turn back and not cross the copper.
- With the snail or slug copper strip, certain areas can be fenced in and protected.
- A major advantage of this method is that it is both animal and environmentally friendly and the strip is easily installed.

Protecting fruits and seeds in an environmentally friendly way

- The anti-bird net and the bird-detererring band are simple and efficient ways to protect ripening fruit, and also seeds, from being eaten by birds.
- If these bird-deterrent measures are used correctly, no further action is needed to ensure ongoing protection.
- Natural and environmentally friendly.
- No poison is needed to keep flower beds and trees safe and to ensure that ripe fruit or scattered seeds are not eaten.
